

Europeana v3 & ENUMERATE

Managing intelligence
on the progress of
digital cultural heritage
in Europe

Luxembourg, 5 September 2013

Results of ENUMERATE

A well documented methodology to measure the progress of digital cultural heritage in Europe on:

1. Size and growth (supply)
2. Access and impact (demand)
3. Costs (economics)
4. Preservation (sustainability):

A baseline of data about digital strategies and activities of 2000 cultural heritage institutions in Europe

A dataplatform incl. benchmarking tools

A network of national coordinators (mostly from Ministries of Culture) that assist with the sampling and the translations of the surveys.

ENUMERATE Surveys (2012-2014)

Year 1: CORE SURVEY

A high-level survey aimed at establishing a baseline of statistical information about Digitisation, Digital Preservation, Digitisation Costs and Online Access to Digital Cultural Heritage.

Year 2: THEMATIC SURVEY

A detailed and in-depth survey aimed both at enhancing the quantitative data and supporting it with qualitative information.

Year 3: CORE SURVEY

A reiteration of the initial survey, aimed at improving the quality of the data and providing trend information and analysis to inform policy development.

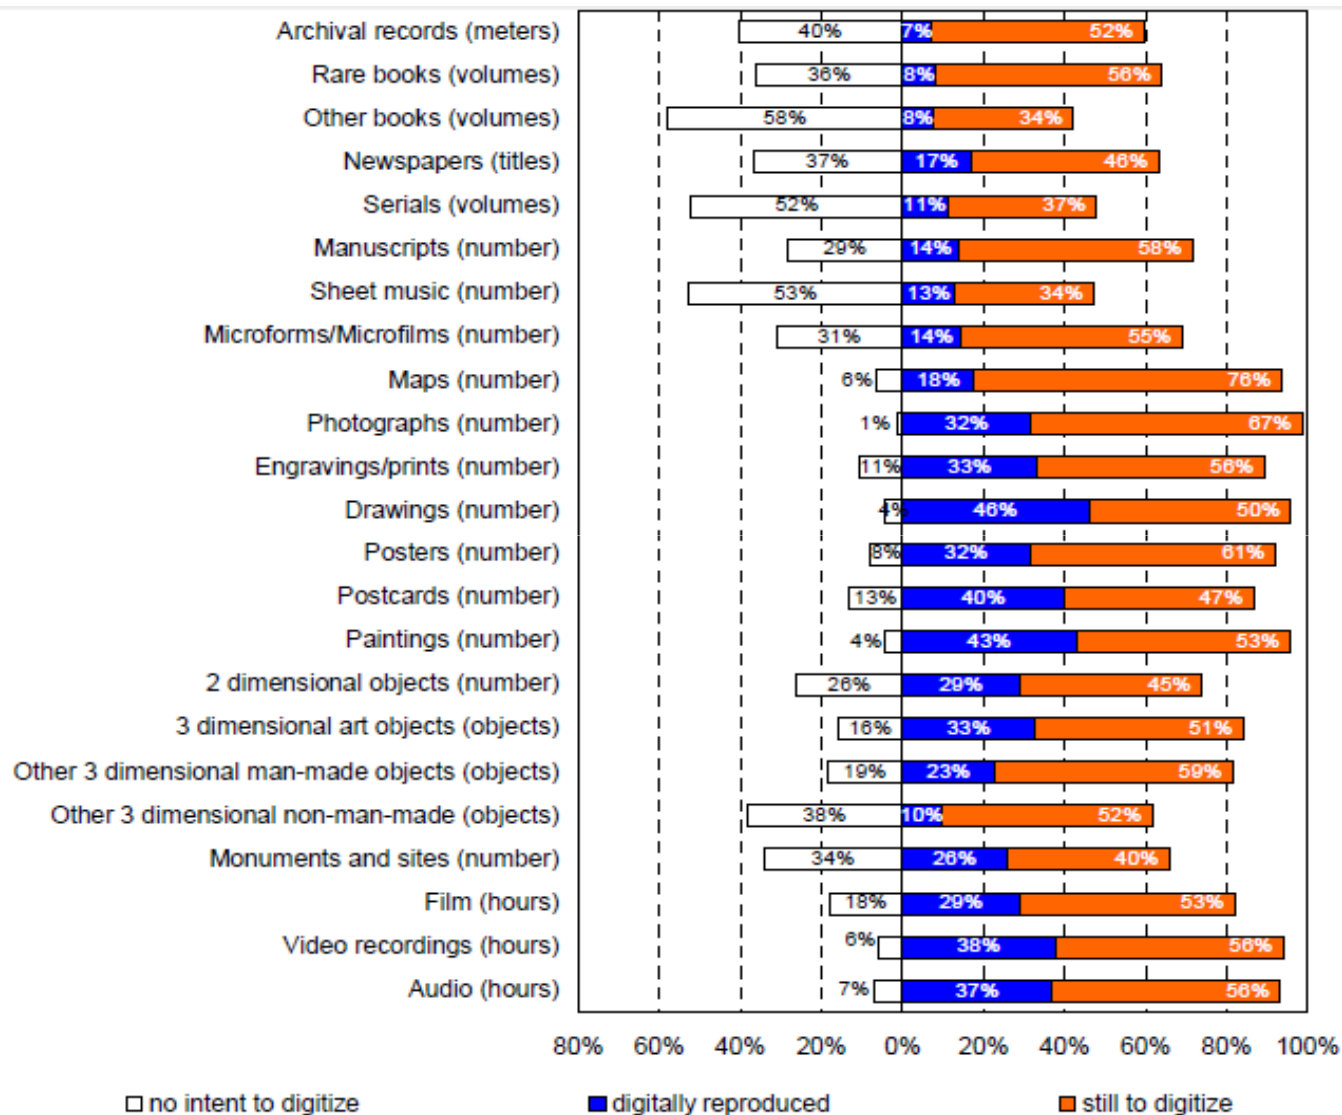

Figure 8: Part of the collection currently digitized, intended to digitize and with no intention to digitize (n=200)

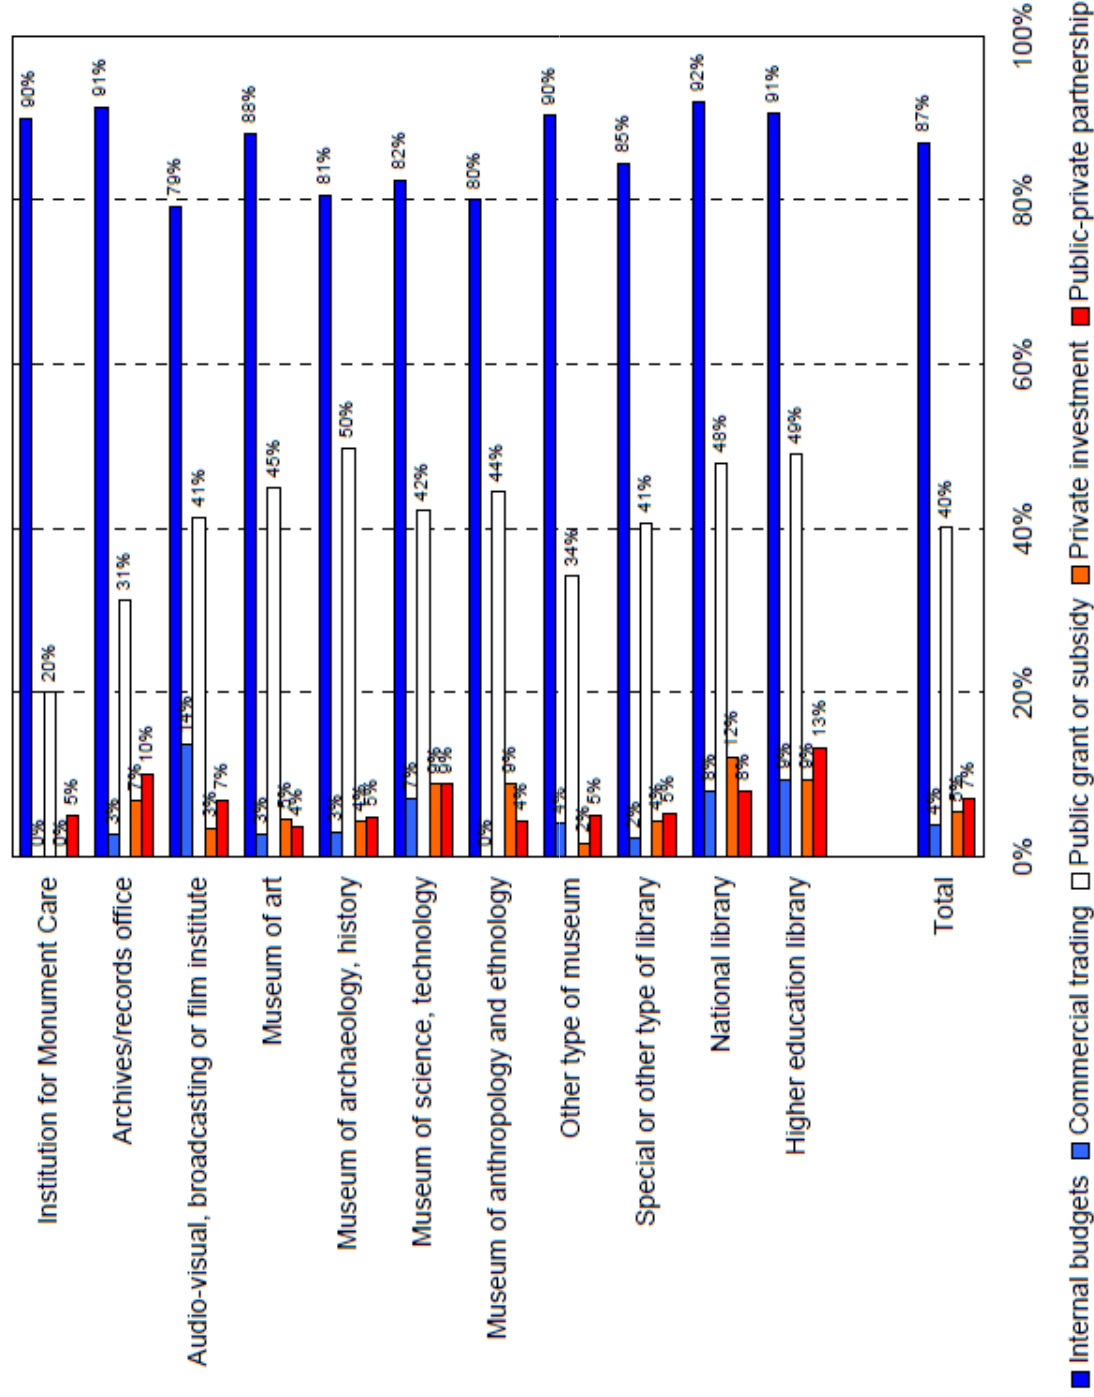

Figure 23: From what sources are the digitisation activities funded? (n=1584)

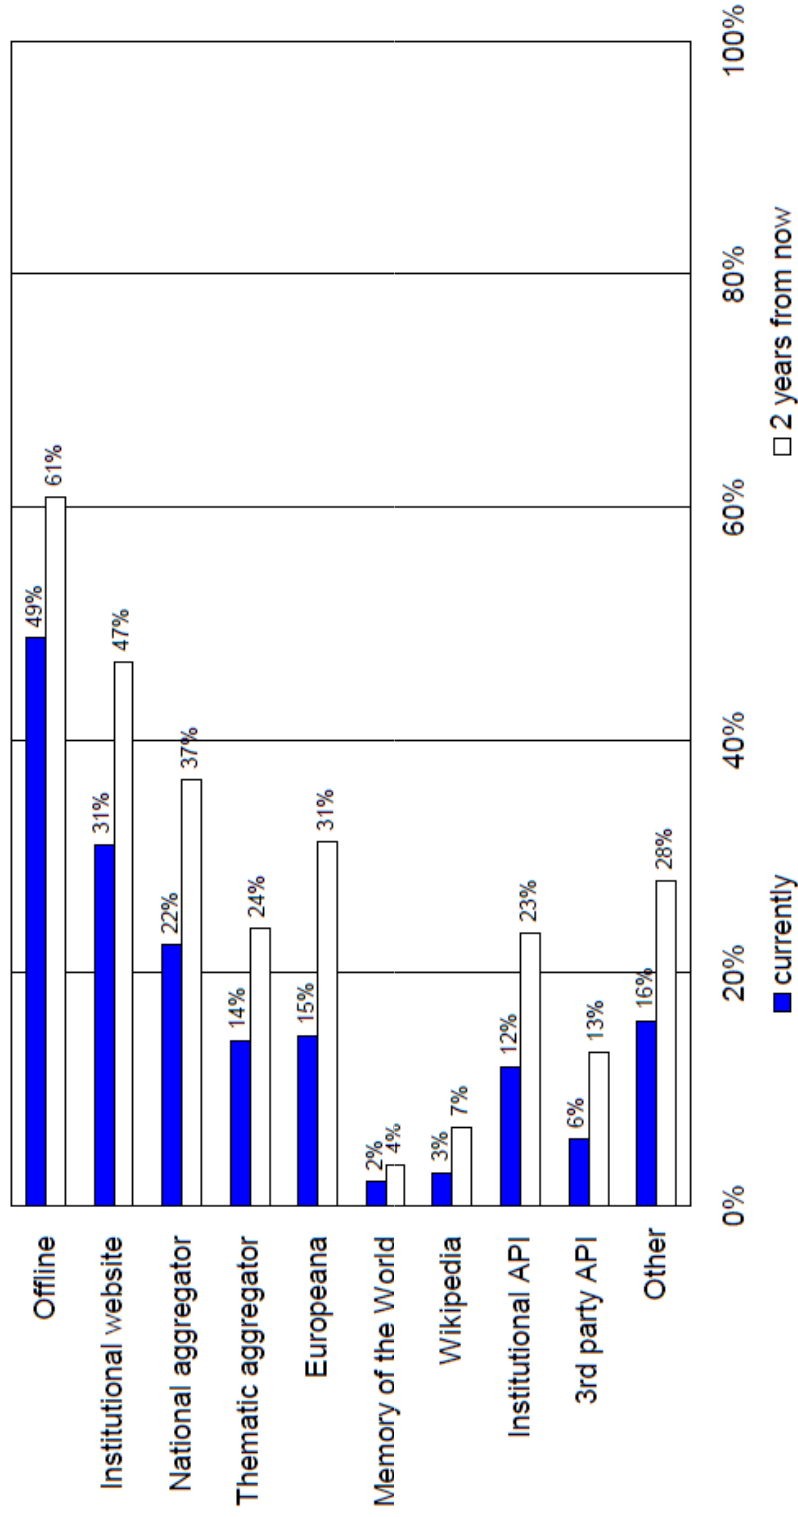

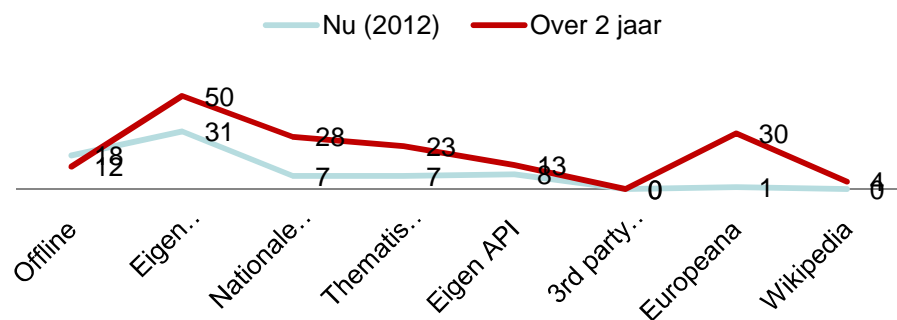

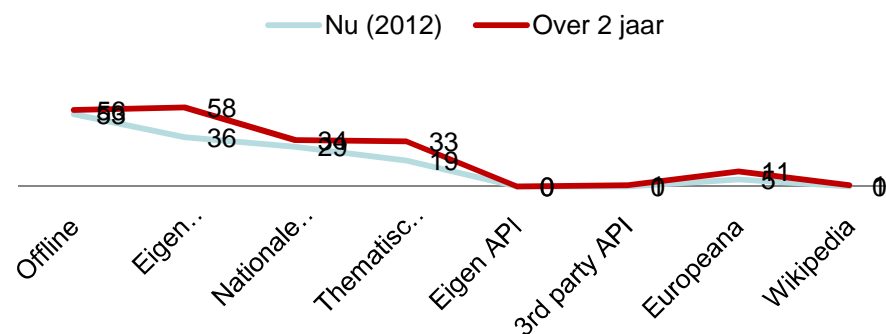

Figure 15: Which percentage of the digital collections is accessible through which options? (n=774)

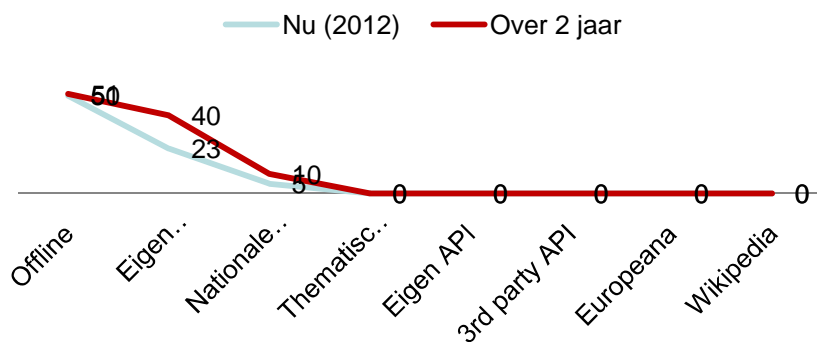

Beschikbaarheid digitaal erfgoed bij bibliotheken (n = 11)

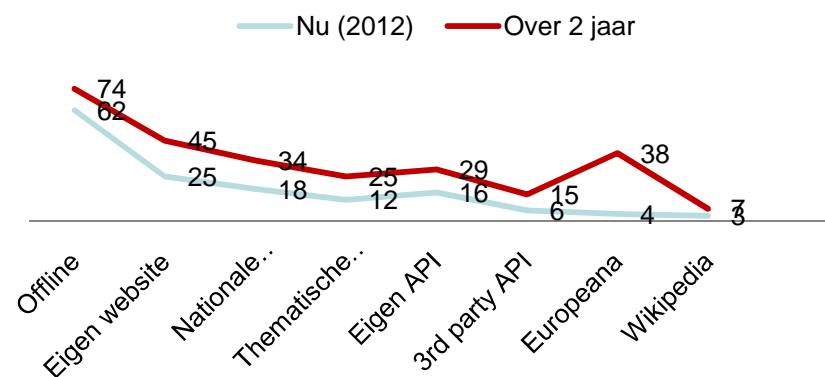

Beschikbaarheid digitaal erfgoed bij archieven (n = 23)

Beschikbaarheid digitaal erfgoed bij monumentenzorg (n = 3)

Beschikbaarheid digitaal erfgoed bij musea (n = 56)

What ENUMERATE contributes to Europeana v3

- Quantify the potential of the growth of Europeana
 - Support strategic choices, e.g. the domain-specific approaches
 - A better understanding of the existing relationships between CH-institutions, creative industries (PPP's) and end-users
 - Assist with the management of KPI's
 - A context and a focus for the quantitative research results from projects in the Europeana ecosystem
-
